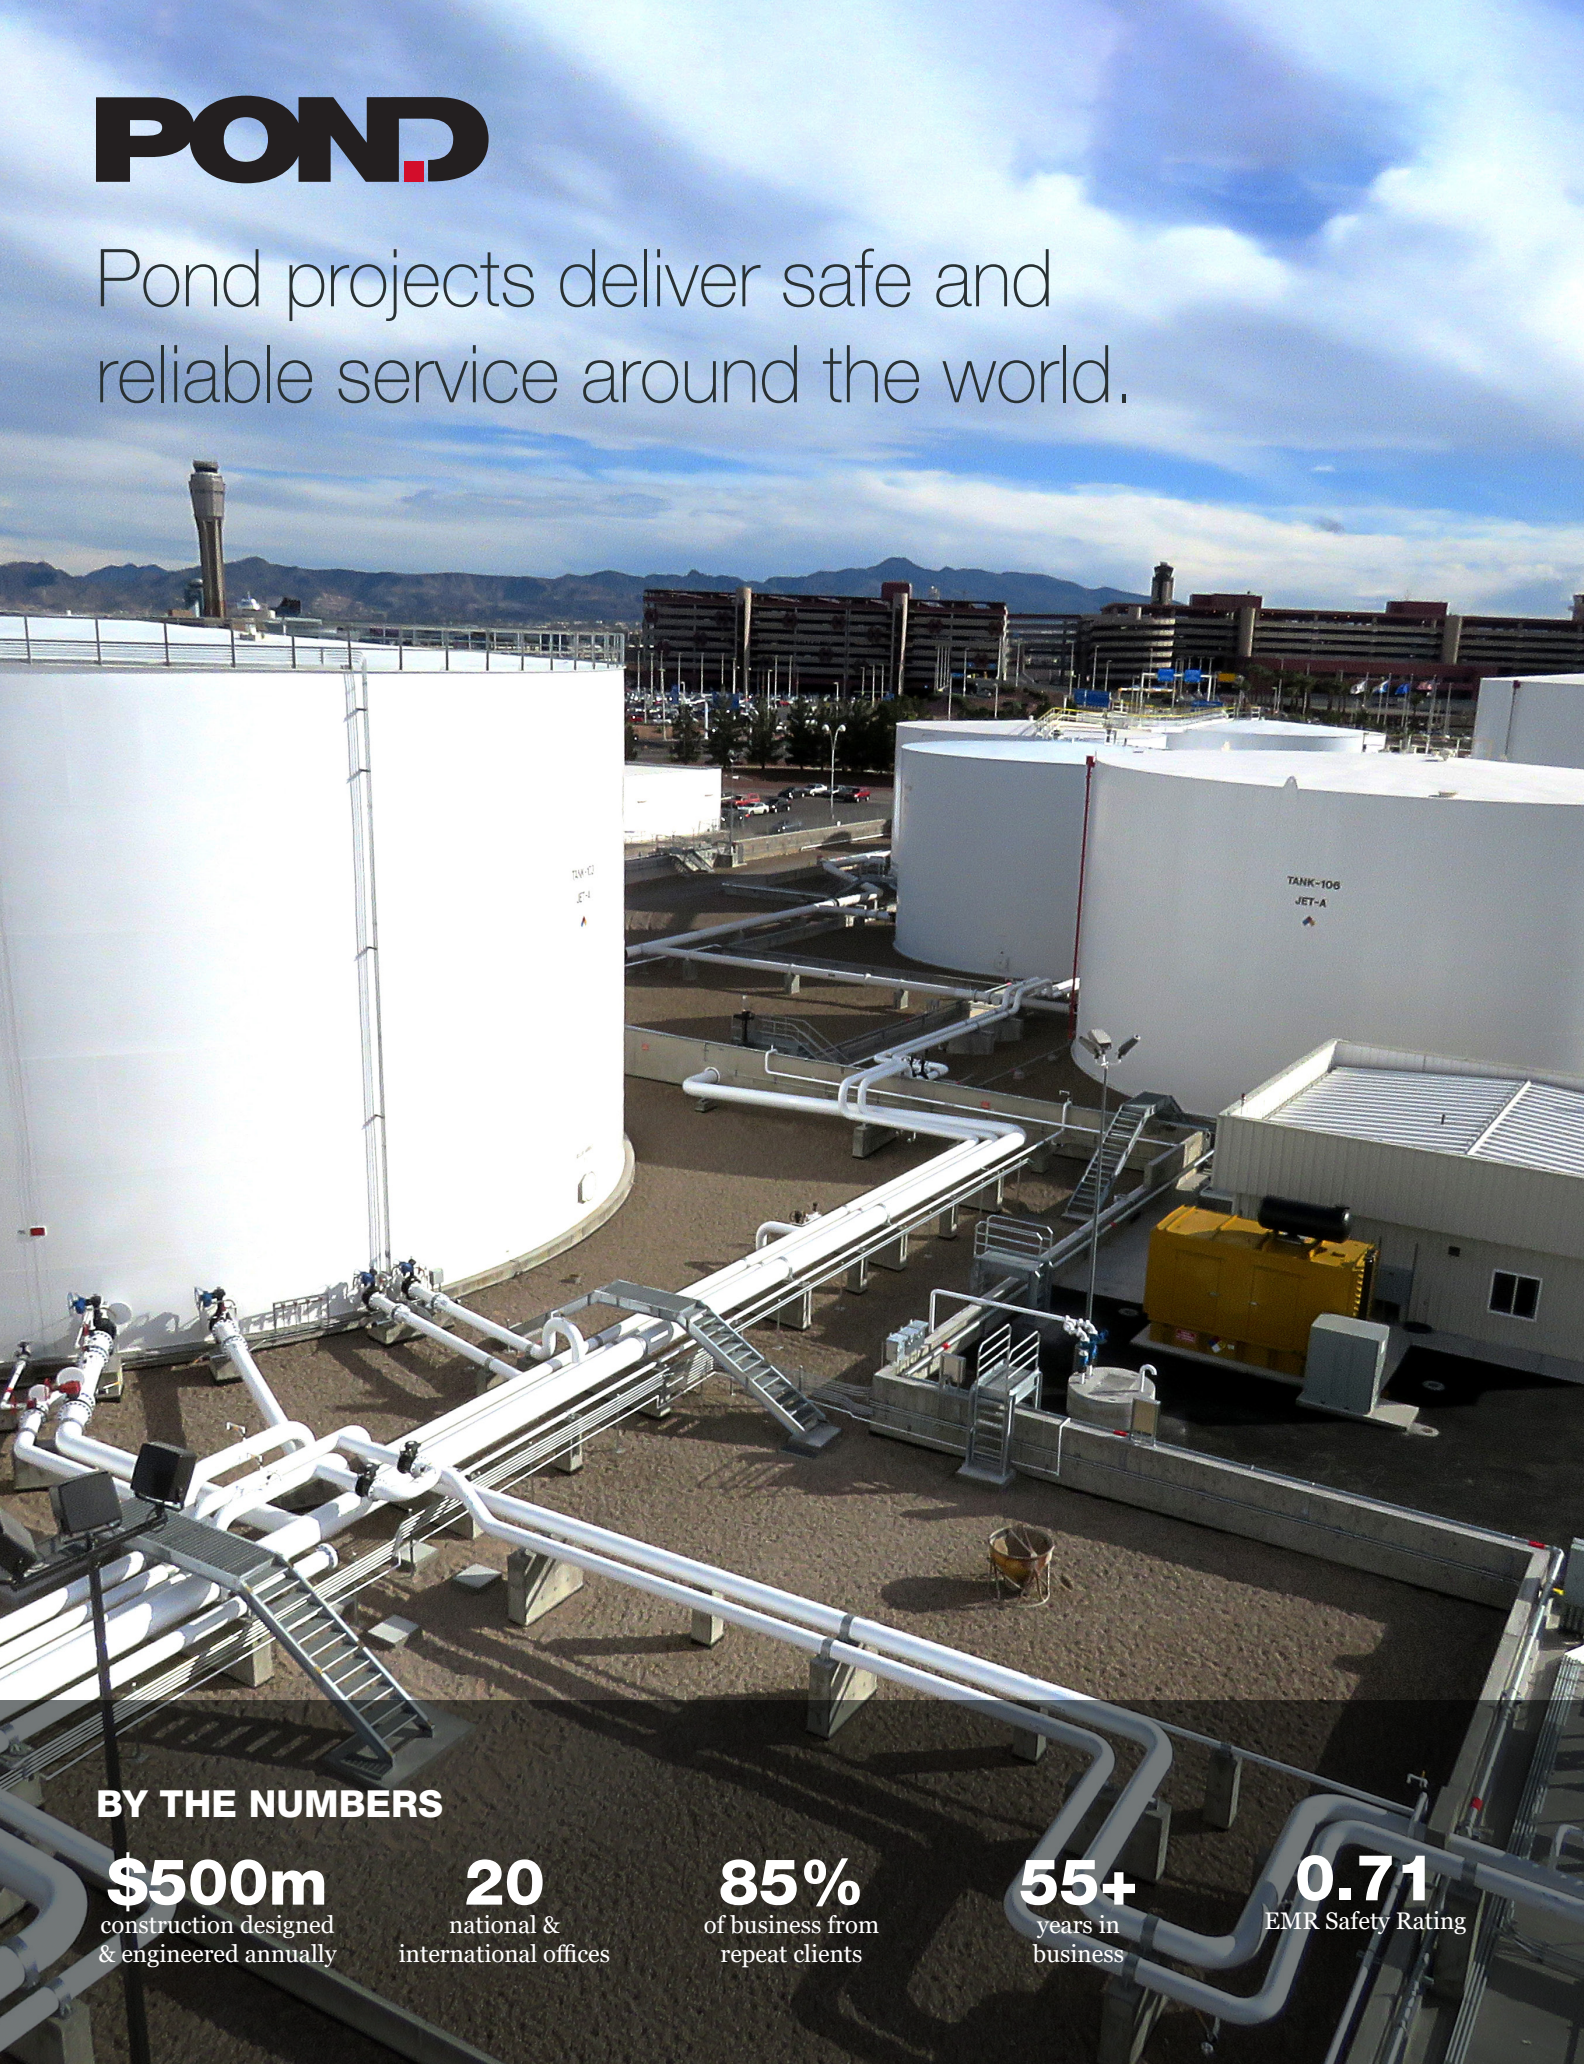
POND

Pond projects deliver safe and reliable service around the world.



BY THE NUMBERS

$500m
construction designed & engineered annually

20
national & international offices

85%
of business from repeat clients

55+
years in business

0.71
EMR Safety Rating

PROFILE

Established in 1965

Full-service architecture, engineering, planning and construction

100% in-house support for all engineering services

Headquarted in Atlanta, Georgia with 20 offices and over 550 professionals across the nation and around the world

SERVICES

- POL | Fueling
- Cathodic Protection
- AC Mitigation
- Corrosion Control
- Coatings Inspection
- M | E | P Engineering
- Civil Engineering
- Fire Protection
- Construction Services
- Environmental Services
- Program Management
- Architecture
- Aviation
- Cost Estimating
- Facility Assessments
- Feasibility Studies
- Space Facilitation
- GIS Services
- Interior Design
- Landscape Architecture
- Master Planning
- Public Safety
- Bridge Design
- Site Development
- Structural Engineering
- Sustainable Design
- Transportation

DEDICATION | COMMITMENT

Pond is an Engineering, Architecture, Planning, and Construction firm that provides technology-driven services to clients throughout the nation. As a full-service firm, Pond is able to bring together every skill your organization requires to achieve your mission.

Our exhaustive array of in-house capabilities has led to Pond's rich history of producing award winning, context sensitive, and innovative projects. Full-service capabilities benefit our clients by delivering greater value through teamwork, responsiveness, communication, quality control, and project coordination.

When you choose Pond as your partner, you will experience responsive people working to successfully complete your project and achieve your mission. Our solution-driven approach separates Pond from the "assembly line" mentality adopted by others in the industry.

Pond prides itself on providing services that exceed our client's expectations. Our philosophy and success is based on listening to our client's needs, and drawing from the expertise of our deep bench of experienced professionals to provide high quality deliverables that are tailored to the client's mission.

ASSET INTEGRITY

CORROSION CONTROL

We provide solutions to government, oil marketers, pipeline and terminal operators, power generation, airport fueling facilities, and gas and water utilities throughout the U.S. and globally.

Pond's team of corrosion professionals provide solutions to address practically any corrosion related requirement.

Pond's nationwide staff of highly trained, specialized and experienced engineers are ready to meet any project challenge. Pond brings a very different level of customer service to our projects. We listen to your needs, schedule meetings to initiate projects and remain focused on regulatory and industry standards (DOT, EPA, OSHA, NACE, API, EPRI and IMPO) which may affect the project approach. Customers consider Pond a true business partner, and a trusted adviser.

SERVICES | CAPABILITIES

- AC Mitigation Testing & Design
- Compliance Audits
- Facility Assessments
- SPCC / FRP Development
- API 653/570/510 Inspections
- STI SP001 Inspections
- Cathodic Protection Survey & Design
- CIS/DCVG Survey
- QP-5 Coatings Inspection
- Internal Corrosion Assessments
- DOT Compliance
- Integrity Engineers
- Mechanical & Electrical Engineers
- Civil & Structural Engineers
- Fire Protection Engineers
- Operations Specialists
- API/ASNT/AWS Inspections

COATING ENGINEERING SERVICES

Pond will help you extend the life of assets by providing project specific specifications, effective engineering, and quality inspections.

QP-5 Qualified Inspection Services

Supporting our specialists is a full-service engineering company including mechanical, civil, electrical and architectural expertise.

Pond's in-house NACE and SSPC protective coatings specialists will work with you to assess and analyze the integrity of your fueling system's corrosion protection systems. Regular maintenance and surveys will ensure that your system is functioning the way it should and will continue to do so.

At Pond, we're creating the next generation of corrosion engineering consulting solutions. With strategically located offices around the world, we are well positioned to provide timely responses to priority requirements. Our highly-skilled staff, unequaled stability, exceptional safety record and insurance adequate for essentially any project means Pond stands ready to support you.

CAPABILITIES

- QP-5 Qualified Inspection
- Protective Coatings Specialists
- NACE Certified Coatings Inspectors
- Coatings Evaluation
- Material Selection
- Maintenance Recommendations
- Repair Prioritization

SERVICES

- Coating Condition Assessments
- Coating Specification Writing (Redline)
- Application Inspection
- Project and Contract Management
- Lead and Generic Coatings Testing
- Failure Analysis and Investigations

INTEGRITY MANAGEMENT

Highly trained API and STI inspectors don't just identify problems — they find the cause and develop a solution.

Pond employs numerous integrity engineers with specialized experience in all types of inspections over multiple industries.

Pond provides Integrity Management services for all types of systems, vessels and structures, including tanks, pipelines, pressure vessels and equipment. Our teams, led by certified engineers and technicians, first perform facility condition assessments, then develop emergency and/or programmed repairs, system upgrades and proper maintenance procedures to improve system integrity and extend service life. Our inspections are engineering based; we don't just identify problems, we find the cause and provide our clients with solutions.

Our integrity engineers are highly trained to identify not only the current condition of a facility, but also the operation and maintenance practices to ensure continued integrity. This is especially helpful when developing inspection strategies and plans to maintain compliance and asset integrity.

SERVICES

- API 510/570/653 Inspections
- API 580 Risk Based Inspection Programs
- STI SP001 Inspections
- Integrity Database Management and Implementation
- ILI Management Support
- RMP / PSM Program Support
- Repair / Alteration Design
- Re-rating of Storage Tanks, Piping, and Pressure Vessels
- Facility Assessments
- Non-Destructive Testing

MECHANICAL AND PIPELINE INTEGRITY

Highly trained mechanical integrity and corrosion engineers don't just identify problems; they find the cause and develop a solution.

Providing cradle-to-grave solutions when developing inspection strategies and plans to maintain compliance and asset integrity.

ENGINEERING SERVICES | CAPABILITIES

- API 579 Fitness for Service Assessments
- Gap Analysis
- Facility Integrity Assessments
- Positive Material Identification (PMI) - Material Verification
- Risk Management Program (RMP) Development
- Wind and Seismic Evaluations
- API 580 RBI Based Inspection Programs
- Hurricane Preparedness Plans
- Integrity Database Management & Implementation
- Integrity Management Plans
- Process Safety Management (PSM) Program Development
- Repair/Alteration Design
- Re-Rating of Storage Tanks, Piping, and Pressure Vessels
- Spill Prevention, Control, and Countermeasure (SPCC) Plan Development
- Storage Terminal Operation, Maintenance, Environmental, and Safety (OMES) Plans
- 3D Laser Scanning Services
- Due Diligence Assessment

INSPECTION SERVICES | CAPABILITIES

- API 510, 570, 653 Inspections
- STI SP001 Inspections
- Certified Weld Inspection (SCWI, CWI)
- Corrosion Mapping
- Guided Wave Testing (GWT)
- Liquid Penetrant Inspection (LPI)
- Magnetic Flux Leakage Inspection (MFL)
- Magnetic Particle Inspection (MPI)
- Phase Array Ultrasonic Testing (PAUT)
- Shear Wave Ultrasonic Testing
- Ultrasonic Thickness Testing (UTT)
- 3rd Party Radiograph Review
- Visual Inspection (VT)
